### Attitude/ History/ Background/Relationships:

Sweet talking mom, always has a big helpful smile on her face. Loves her daughter Kristin and just wants to encourage her and nurture her and lives for that. She grew in Phoenix also and sees Stern Mom Peg at 24 Hour Fitness. She loves to go out to eat at the Cheesecake Factory and order fun foods- especially the mac and cheese! She is too chipper and too perky, but she means well and it pisses people off. She used to be just an average person, growing up in Phoenix, until she had Kristin, then her life had meaning. She devotes ALL of her time annoyingly to Kristina and Kristin is completely tolerant of it but rolls her eyes all the time. Marie is super sticky as a person, friend and mom. She divorced a year ago, because her husband had an affair, so she pours herself into home and motherhood, but she is happy and all that fulfills her OCD, which she refuses to take meds for. Secret tidbit, her sister overdosed on OCD medication and it had a reverse effect and she counts everything 24/7- that scared Marie! She says "great!"- constantly.

### Motivation:

To be the best at everything to no end and regardless of the exhaustion of effort that may take.
